	3. Chairman Dr. P Kishorekumar also explained the insights of course structure in a brief manner.
Resolutions:	External BoS Member, Dr. N Mohan Rao insisted that to organize an equal number of course objectives and course outcomes for a course.
Agenda 2:	To consider and approve the I B. Tech I & II semester courses syllabus to be implemented w.e.f.A.Y 2023-24.
Discussed Points:	<p>1. Chairman Dr. P Kishorekumar proposed the course syllabus of Basics in Civil and Mechanical Engineering (Mechanical Engineering Part). He proposed to rearrange the syllabus topics of unit-2 and unit-3. He proposed to include design and manufacturing topics in one unit and thermal engineering topics to be placed in one unit.</p> <p>2. Chairman Dr. P Kishorekumar proposed the course syllabus of Engineering Graphics. Discussion was carried over the syllabus of Engineering graphics, since it's a common course for all the Engineering streams and come up with a necessary change which includes rearrangement of topics in unit 2 and unit 3, and removal of scales topic on unit-1 and included eccentric method in curves topic.</p> <p>3. Chairman Dr. P Kishorekumar proposed to rearrange Engineering Mechanics course syllabus, since the syllabus is not uniformly distributed, relevant topics were rearranged and optimized.</p> <p><u>Proposed changes (Added topics):</u> Unit-1: In system of forces topic, resultant of forces systems in plane and space. Equilibrium of system of forces. Unit-2: Friction. Analysis of plane trusses using the method of joints and method of sections Unit-4: Area moments of inertia and mass moments of inertia. Unit-5: Rectilinear and Curvilinear motion of a particle.</p> <p><u>Proposed changes (Removed topics):</u> Unit-1: The graphical method, triangular law of forces, converse of the law of polygon of force condition of equilibrium. Unit-II: Impending motion, coulomb's law of dry friction. Principle of virtual work. Unit-III: Area moments of inertia and mass moments of inertia. Unit-IV: Rectilinear and Curvilinear motion of a particle</p>

	4. Chairman explained the Engineering Workshop and Engineering Mechanics lab syllabus
Resolutions:	<ol style="list-style-type: none"> 1. External BoS Member, Dr. N Mohan Rao, Appreciated and approved the proposal to rearrange the syllabus to maintain uniformity in Basics in Civil and Mechanical Engineering. 2. Based on the external BoS Members suggestions, 'Eccentricity method' was added in curves topic for better understanding. And insisted on compromising in scales topic in Engineering Graphics. They also suggested organizing the units for weightage distribution of marks. 3. External BoS members appreciated the optimization of Engineering Mechanics course syllabus and suggested a few modifications to reflect in the final syllabus draft. 4. External BoS Members felt Engineering workshop and Engineering Mechanics Lab syllabus is appropriate and insisted for no changes.

All the BoS members have asked to email all the related documents, so that they can go through for any further constructive comments. At 11:30 AM, Dr. P Kishorekumar, HOD, ME concluded the meeting by accepting all the suggestions of the BoS members and assured us to reflect all in syllabus and course structure.

POINTS OF DISCUSSION:

1. About B.Tech First year I & II Semester Course structure and Syllabus of Regulation SRK-23
2. About M.Tech First and Second year I to IV semesters Course structure and Syllabus of SRK-23. Under this, modifications in Advanced Data Structures & Algorithms Lab, Mean stack Technologies Lab, Machine Learning and Cloud Computing Theory subjects.
3. About Open electives offered by M.Tech program to other branches which are having M.Tech program.
4. About the detailed Course- Contents of IT Lab - I & II for MBA I & II Semesters, Fundamentals of computers - Integrated MBA I Semester, Decision Support Systems - Integrated MBA VI Semester

RESOLUTION:

1. About B.Tech First year I & II Semester Course structure and Syllabus of SRK-23.

As per the suggestions of Dr.A.Krishna Mohan, University Nominee and the two subject experts Dr.M.Kamala kumari and Dr.B.N.Jagadesh, for Computer Science and Engineering and allied branches of CSE in the SRKIT College (Artificial Intelligence and Machine Learning, Data Science), JNTUK proposed Course structure and Syllabus is approved.

2. About M.Tech I and II year I to IV semesters Course structure and Syllabus of SRK-23.

i. University Nominee, Dr.A.Krishna Mohan, suggested to add two experiments to the existing experiments of Advanced Data Structures & Algorithms Lab which comes under I year I semester. The two experiments are implementation of searching algorithms and sorting algorithms. These two are added as experiment 10 and 11 in the syllabus.

ii. External subject expert Dr.B.N. Jagadesh suggested that club the first two weeks experiments and make it as single week so that newly added experiments have sufficient time to execute.

iii. University Nominee Dr.A.Krishna Mohan, suggested that change the unit V contents to unit IV in Machine Learning subject in the I Year II semester and add two new topics namely Ensemble Methods and Random Forest Algorithm as these two topics are useful for analysis and research.

iv. University Nominee, Dr.A.Krishna Mohan, suggested to add PHP,Servlets and JSP in MEAN Stack Technologies theory subject. Based on these additional topics lab experiments are involved in the Mean stack technologies lab of I year II semester.

v. University Nominee, Dr.A.Krishna Mohan, and the two subject experts suggested to add A case study of WEB Hosting in AWS,AZURE platforms and implementation of deployment and development of static site in the Cloud Computing subject of I year II semester. The added topics are useful to drive the students to the current trends of cloud computing.

vi. University Nominee, Dr.A.Krishna Mohan, and the two subject experts suggested to add Speech Recognition, H2O.ai, Deep Learning Kit in the v unit of Deep Learning subject of II year I semester. The reason to add the new topics are because we can implement speech recognition application using deep learning models. Sparse coding is a class of unsupervised methods, not the area of application. H2O.ai, Deep Learning Kit is Introduction to Deep Learning tools as they are latest tools. It will benefit to students who learn the latest tools in Deep Learning.

vii. University Nominee, Dr.A.Krishna Mohan, and the two subject experts suggested to change the subject in the open electives. In place of Next Generation Databases add MongoDB subject as the other branch M.tech students are not aware of database concepts.
