The eye tests were conducted in three stages and the students who were found to have weak eyesight were prescribed perfectly fitting spectacles with lenses as per their required powers. Moreover, each student was counseled regarding their eyesight and they were also advised about the importance of wearing spectacles on a regular basis to protect their precious eyes. The event was a fruitful one as many students benefited from the eye check-up and the timely intervention of the college helped them to focus on their studies in a better manner. The event not only helped to prevent the further deterioration of the eyesight of the students but also provided a sense of relief to the parents.

SWACHHTA PLEDGE

Mahatma Gandhi dreamt of an India which was not only free but also clean and developed.

Mahatma Gandhi secured freedom for Mother India.

Now it is our duty to serve Mother India by keeping the country neat and clean.

I take this pledge that I will remain committed towards cleanliness and devote time for this.

I will devote 100 hours per year, that is two hours per week, to voluntarily work for cleanliness.

I will neither litter nor let others litter.

I will initiate the quest for cleanliness with myself, my family, my locality, my village and my work place.

I believe that the countries of the world that appear clean are so because their citizens don't indulge in littering nor do they allow it to happen.

With this firm belief, I will propagate the message of Swachh Bharat Mission in villages and towns.

I will encourage 100 other persons to take this pledge which I am taking today.

I will endeavour to make them devote their 100 hours for cleanliness.

I am confident that every step I take towards cleanliness will help in making my country clean.

Respected Sir / Madam,

Sub: On the Occasion of World Heart Day - CPR training - Reg.

World Heart Day is a reminder to everyone around the world to take care of their hearts. This year's campaign focuses on the essential step of knowing our hearts first.

29th September, World Heart Day is an important occasion that highlights the significance of cardiovascular health. On this World Heart Day, our focus is on the need to increase the number of CPR trained individuals in our country. It is alarming to note that currently only 2% of the population is CPR trained. This calls for immediate action to ensure that more people are equipped with the life-saving skills of CPR.

We plan to collaborate with Educational institutions and corporates to make CPR training mandatory. By working closely with educational institutions and organizations, we aim to ensure that CPR training becomes a part of the curriculum and mandatory for employees. This step will not only increase the number of CPR trained individuals but also create a culture of preparedness and emergency response within our society.

Our aim to make a significant impact on the overall CPR training rate in our country. It is crucial to understand that CPR has the potential to save lives during cardiac emergencies. By increasing the number of CPR trained individuals, we can improve the chances of survival for those in need.

On this World Heart Day, let us join hands and work towards a future where every individual is CPR trained. Together, we can make a difference and create a safer and healthier society.

Warm regards

Description	SRKIT- NSS Unit organized CPR Awareness Program in association with Manipal Hospital – Guntur District on 27/09/2023. Dr.Lakshmi Navaya Cheekatla Garu from Manipal Hospital on the occasion of World Heart Day (29-09-2023)gave an awareness to the students on Major cardiac arrests occur in places other than the hospitals, especially at homes/public places like railway stations, bus stands/gyms/swimming pools etc. It take a minimum of 8-10 minutes for the emergency response team (ambulance with equipped AED and a trained personnel in conventional CPR) to arrive at the scene of sudden cardiac arrest and collapse. And for every minute of delay in CPR, there is a 10% loss of function in brain and thus the victims chance of survival also decreases. If the community is trained in hands-only CPR these deaths are preventable. Hence everyone needs to have knowledge and skills on saving a person suffering from cardiac arrest. The participants are well aware about the CPR Process at the end of the program.
