Date: 23-07-2021 & 24-07-2021

Duration: 2Days

The Department of Electronics and Communication Engineering, SRK Institute of Technology has organized a two day workshop on **"PCB DESIGN"** on 23-07-2021 & 24-07-2021 for II/IV ECE - A students. The Resource Person is **V Govinda Rao,** Managing Director, Microlink Peripherals Pvt. Ltd. They have organized workshops on continuous basis to enhance student's practical & technical skill and to make them compatible with industry.

The workshop was aimed to provide knowledge about Complete PCB Designing using simulation tool to test electronics & electrical circuit in software environment and also its Fabrication, PCB design software named PCB Wizard & to make physical PCB at home so that any student can make project on his own. Almost 47 students from ECE-A have participated in the workshop.

No. of Participants: 47

Following content are covered in workshop:

- ✓ PCB Design & Routing
- ✓ Schematic Design
- ✓ Component Footprint Design
- ✓ Integrated Library Design
- ✓ Etching of PCB
- ✓ Soldering of Components on to PCB.

The duration of this workshop was two days, with seven hour session each day in a total of fourteen hours properly divided into different hands on sessions. The entire participants were divided into two batches of 25 students each and parallel both the software and hardware sessions were conducted on both the days.

On23rd July, 2021 the first session of expert talk by Mr. V Govinda Rao started at 10:00A.M. They started with introduction of PCB Designing, Benefits of the workshop and its applications.
They explained Schematic Design of Circuit& terms related to PCB i.e.,

- ✓ Copper Clad – Raw material of PCB formed by sticking a thin layer of copper conductive coil on the non conductive material.
- ✓ Art Work – Process of repairing different layouts for PCB manufacturing.
    1. Component side Art Work
    2. Solder side Art Work.

- ✓ Tinning – Applying the lead at the soldering points.
- ✓ Drilling – The process of making holes at soldering points for fixing of components.
- ✓ Etching – Chemical process of removing unwanted copper on PCB from copper clad.
- ✓ PCB types :
    1. Single Sided PCB
    2. Double Sided PCB
    3. Double Sided with PTH

SRK Institute of Technology, Enikepadu, Vijayawada – 521108, Andhra Pradesh, (herein after called SRKIT) is affiliated to Jawaharlal Nehru Technological University, Kakinada, Andhra Pradesh. SRKIT has taken a progressive step in the field of sanitation by initiating actions for incorporating Open Defecation Free ++ (ODF ++) / Faecal Sludge and Septage Management (FSSM) in the certification program soon to be launched at SRKIT. Also, it is decided to take a step towards sensitizing motivated students working in the field of FSSM. This would go a long way in realizing the vision of making Andhra Pradesh an ODF++state.

SRKIT herewith has taken yet another progressive step towards girl students. Despite growing number of girl students in engineering streams, there is still a gender gap that needs to be bridged. In this regard, it is decided to take a step in sensitizing the community on the need for empowerment of women. Also, if girl students are trained as change makers for environment related issues, it will go a long way in protecting the environment and society.

Administrative Staff College of India (herein after called ASCI) is a leading institution offering training, research and consultancy services in the field of urban management (amongst other areas) with a focus on urban sanitation and water. The ASCI is a knowledge partner to Government of Andhra Pradesh (GoAP) for helping the state achieve its urban sanitation goals. The ASCI has established a Technical Support Unit (TSU) at Swachha Andhra Corporation which also supports the Commissioner and Directorate of Municipal Administration (CDMA) in implementing the Faecal Sludge and Septage Management (FSSM) policy and all the activities within that. With a view to sustain the sanitation improvements being undertaken by the GoAP, ASCI is committed to build the capacities of academic and research institutes of repute.

The Memorandum of Understanding covers the following points:

PROGRAM REPORT

Date: 21-06-2021

Title of the Program: An Online Seminar on"FAECAL SLUDGE & SEPTAGE MANAGEMENT- AN APPROACH FOR SAFER ENVIRONMENTAL SANITATION"

Resource person : Sri Uday Singh Gautam, State Program Manager & Sanitation Expert, ASCI stationed at Vijayawada, Andhra Pradesh. Ph.no.9849333311.

Guests: Dr. Malini Reddy & Dr. Priyanka Reddy
Members of ASCI, Hyderabad

Duration : 2hours (11:00AM to 01:00PM)

No. of Participants : 124

Organized by: Department of Civil Engineering, SRKIT.

Collaboration: Conducted in association with Administrative Staff College of India, Hyderabad (ASCE) as a part of the MoU signed with the Institute.

Description : Sanitation in India is a key to achieving improved public health and enhanced socio-economic outcomes. To achieve this objective, Ministry of Urban Development has launched two key schemes namely, Swachh Bharat Mission (SBM) and Atal Mission for Rejuvenation & Urban Transformation (AMRUT). While SBM aims to end open defecation by universalizing construction and use of toilets, AMRUT is aimed at strengthening the sewerage and water supply network of the country. Both schemes aim to holistically address the existing gaps under the sanitation value chain in India.

At present, the penetration of sewerage systems is low in the country and more than 45% of urban Indian households are dependent on On-Site Sanitation (OSS) systems. Thus, till the time the Government's vision of 100% sewerage universalization is

achieved, it is felt that faecal sludge output needs to be managed in an environmentally safe and sustainable manner using complementary and alternative methods of treatment. In view of this, the Ministry of Urban Development is launching the National Policy on Faecal Sludge and Septage Management (FSSM) to facilitate nationwide implementation of FSSM in India.

Main Objective: To impart knowledge on all the important aspects of Faecal Sludge for the design and operation of a comprehensive FSSM system.

Broad Objectives:

1. To ensure that all benefits of wide access to safe sanitation accrue to all citizens across the sanitation value chain with containment, extraction, transportation, treatment, and disposal / re-use of all faecal sludge, septage and other liquid waste and their by-products and end-products.
2. To promote access for households to safe faecal sludge and septage management facilities (including proper disposal arrangements).
3. Suggest and identify ways and means, including the methods and resources, towards creation of an enabling environment for realising safe and sustainable FSSM in India.

Content covered by the Resource Person:

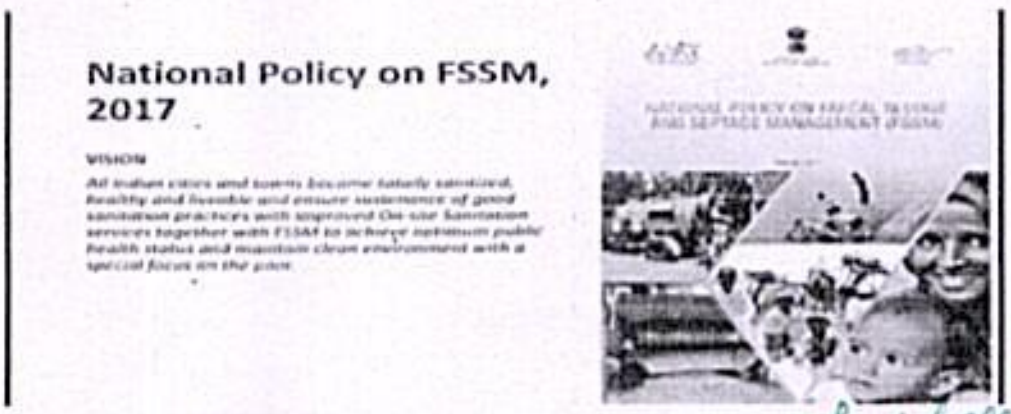

- ✓ Design of septic tanks, pits etc. (adapted to local conditions), including siting, and methods of approval of building plans, or retro-fitting existing installations to comply with rules and byelaws.
- ✓ Delineation of private (individual houses, groups housing, institutions etc.) and public responsibilities (urban local bodies and other local authorities) in relation of faecal sludge and septage management.
- ✓ Details of the planning and implementation process for carrying out safe and sustainable management of all faecal sludge and septage. This may be integrated with overall city land use planning, with the timelines for holistically addressing waste water management via on-site, decentralised or centralised systems.
- ✓ Special provisions for medium and large format real estate developments.
- ✓ Frequency of desludging, and O&M of installations and the responsibilities of householders (owner/occupant).

PRINCIPAL
SRK INSTITUTE OF TECHNOLOGY
ENIKEPADU, VIJAYAWADA

- ✓ Operating procedures for desludging including safety procedures with an emphasis on the safety, health and dignity of sanitation workers.
- ✓ Licensing, record-keeping, monitoring and reporting arrangements for faecal sludge and septage service providers.
- ✓ Methods and locations of transport (conveyance), treatment and safe disposal.
- ✓ Tariffs or cess/tax etc. for septage management in the city. Penalty clauses for untreated discharge for households as well as desludging agents and unsafe emptying and handling of faecal waste.
- ✓ Regular monitoring and evaluation of the entire process of FSSM.
- ✓ Training, accreditation, education and awareness programs.

Outcomes:

1. Have an understanding of the treatment, management, and planning aspects related to FSM, and how they interact;
2. Comprehend the importance of proper sludge characterization for optimal collection and transport, treatment and reuse;

SRK Institute of Technology, Enikepadu, Vijayawada – 521108, Andhra Pradesh, (herein after called SRKIT) is affiliated to Jawaharlal Nehru Technological University, Kakinada, Andhra Pradesh. SRKIT has taken a progressive step in the field of sanitation by initiating actions for incorporating Open Defecation Free ++ (ODF ++) / Faecal Sludge and Septage Management (FSSM) in the certification program soon to be launched at SRKIT. Also, it is decided to take a step towards sensitizing motivated students working in the field of FSSM. This would go a long way in realizing the vision of making Andhra Pradesh an ODF ++state.

SRKIT herewith has taken yet another progressive step towards girl students. Despite growing number of girl students in engineering streams, there is still a gender gap that needs to be bridged. In this regard, it is decided to take a step in sensitizing the community on the need for empowerment of women. Also, if girl students are trained as change makers for environment related issues, it will go a long way in protecting the environment and society.

Administrative Staff College of India (herein after called ASCI) is a leading institution offering training, research and consultancy services in the field of urban management (amongst other areas) with a focus on urban sanitation and water. The ASCI is a knowledge partner to Government of Andhra Pradesh (GoAP) for helping the state achieve its urban sanitation goals. The ASCI has established a Technical Support Unit (TSU) at Swachha Andhra Corporation which also supports the Commissioner and Directorate of Municipal Administration (CDMA) in implementing the Faecal Sludge and Septage Management (FSSM) policy and all the activities within that. With a view to sustain the sanitation improvements being undertaken by the GoAP, ASCI is committed to build the capacities of academic and research institutes of repute.
